SUBJECT INDEX

Basic data for materials modification and analysis

Finite-angle multiple scattering, Winterbon, K.B. B21 (1987) 1
The electronic stopping and range profile calculations for high energy implantation of phosphorous into silicon, Posselt, M. and W. Skorupa B21 (1987) 8
Approximate expressions for continuous slowing down approximation ranges of high energy electrons and positrons, Pal, P.B., V.P. Varshney and D.K. Gupta B21 (1987) 14
The scattering of doubly charged ions from surfaces, Chapman, G.E., D.J. O'Connor and R.J. MacDonald B21 (1987) 20

Atomic collisions in solids

Shock wave mechanism for cluster emission and organic molecule desorption under heavy ion bombardment, Bitensky, I.S. and E.S. Parilis B21 (1987) 26
Analytical expressions for the internal and kinetic energy distributions of sputtered clusters and molecules, Hoogerbrugge, R. and P.G. Kistemaker B21 (1987) 37
Model of preferential sputtering of multicomponent materials induced by low energy ions, Galkute, L., L. Pranevičius and G. Zubauskas B21 (1987) 46
Measurements of parametric X-rays from relativistic electrons in silicon crystals, Adishchev, Yu.N., A.N. Didenko, V.V. Mun, G.A. Pleshkov, A.P. Potylitsin, V.K. Tomchakov, S.R. Uglov and S.A. Vorobiev B21 (1987) 49

Ion beam modification of materials

The effect of helium layers implanted into thin iron foils on transient magnetic fields, Simonis, H.J., F. Hagelberg, W. Trölenberg, K.-H. Speidel, M. Knopp and J. Gerber B21 (1987) 56

Effects of radiation

VG-13: a nuclear-track-recording glass detector with uniquely high resolution, Price, P.B., H.-S. Park, G. Gerbier, J. Drach and M.H. Salamon B21 (1987) 60
Fission track annealing models and the concept of a single activation energy, Virk, H.S., S.K. Modgil and G. Singh B21 (1987) 68

Analysis of materials

A simple bevelling technique for the depth-profiling of deuterium in steels, Giles, I.S. and C.G. Wilson B21 (1987) 72
Absolute determination of 10^{12} cm^{-2} As in Si by RBS microanalysis (*Letter to the Editor*), Abel, F., B. Agius and J. Gyulai B21 (1987) 77

Experimental methods and equipment

Proceedings of the Sixth International Conference on Ion Implantation Technology (Berkeley, CA, USA, July 28–August 1, 1986)

Section I. Reviews

Historical perspectives on ion implantation, Gibbons, J.F. B21 (1987) 83
Status of IC applications of ion implantation, Smith, T.C. B21 (1987) 90
CMOS process review with implications for ion implantation, Seidel, T.E. B21 (1987) 96

0168-583X/87/$03.50 © Elsevier Science Publishers B.V.
(North-Holland Physics Publishing Division)

Section II. Challenges and emerging technologies

Maskless ion implantation system for three-dimensional fine doping structures in III–V compound semiconductors, Miyauchi, E. and H. Hashimoto B21 (1987) 104
A novel self-aligned oxygen (SALOX) implanted SOI MOSFET device structure, Tzeng, J.C., W. Baerg, C. Ting and B. Siu B21 (1987) 112
Programming of ROMs after metal definition using MeV ion implantation, Pramanik, D. and A.N. Saxena B21 (1987) 116
Current status of ionized-cluster beam technique: a low energy ion beam deposition, Yamada, I. and T. Takagi . B21 (1987) 120
Applications of SIMOX technology to CMOS LSI and radiation-hardened devices, Izumi, K. B21 (1987) 124
Novel dielectric/silicon planar structures formed by ion beam synthesis, Hemment, P.L.F., K.J. Reeson, J.A. Kilner, R.J. Chater, C. Marsh, G.R. Booker, J.R. Davis and G.K. Celler B21 (1987) 129
Effects of high energy boron ions implanted in MOSFETs, Deng, E., H. Wong and N.W. Cheung B21 (1987) 134
Ion implantation into three-dimensional structures, Kakoschke, R., H. Binder, S. Röhl, K. Masseli, I.W. Rangelow, S. Saler and R. Kassing B21 (1987) 142
Analysis of buried layers from high dose oxygen ion implantation, Bunker, S.N., P. Sioshansi, M. Sanfacon, A. Mogro-Campero and G.A. Smith B21 (1987) 148
Deep levels induced by focused ion implantation in GaAs, Yuba, Y., T. Yano, T. Ishida, K. Gamo and S. Namba B21 (1987) 151
Multi-MeV ion implantation accelerator system, DiBitonto, D., R. Huson, P. McIntyre, A. Nassiri, D. Raparia and C. Swenson B21 (1987) 155
Layer thicknesses in oxygen implantation of silicon, Douglas-Hamilton, D.H., R.P. Dolan and H.E. Friedman . B21 (1987) 158
Device characteristics of MOSFETs in MeV implanted substrates, Zappe, H.P. and C. Hu B21 (1987) 163

Section III. Sourcery

Microwave ion source for ion implantation, Sakudo, N. B21 (1987) 168
Very high current ECR ion source for an oxygen ion implanter, Torii, Y., M. Shimada and I. Watanabe B21 (1987) 178
A hollow cold cathode multipurpose ion source, Ma Mingxiu, Li Junping and Zhou Fengsheng B21 (1987) 182
Impregnated-electrode-type liquid metal ion source, Ishikawa, J., Y. Gotoh, H. Tsuji and T. Takagi B21 (1987) 186
Plasma filament ion source for high current implanter, Yabe, E., N. Ishizaka, T. Shibuya, A. Tonegawa, K. Takayama, R. Fukui, K. Takagi, R. Kikuchi, K. Okamoto and S. Komiya B21 (1987) 190
Application of a 3-D computer simulation code for ion beam extraction with a high current Freeman type ion source, Katagawa, T., O. Tsukakoshi, S. Komiya and N. Inoue B21 (1987) 194
Basics of ion sources in BASIC (BIOSIB), Ghanbari, E. B21 (1987) 198
The MEVVA ion source for high current metal ion implantation, Brown, I. and J. Washburn B21 (1987) 201
Negative ion source (NIABNIS) and preparation of transparent carbon films by negative carbon ion beam deposition, Ishikawa, J., K. Ogawa, K. Miyata, H. Tsuji and T. Takagi B21 (1987) 205
Numerical simulation for the discharge mechanism of a TP-D plasma source, Takeshiro, S., K. Takayama, T. Hatori and T. Watanabe B21 (1987) 209
Plasma compression type hollow cathode ion source, Tonegawa, A., T. Shimoyama, E. Yabe, K. Takayama, K. Takagi, R. Fukui, R. Kikuchi, K. Okamoto and S. Komiya B21 (1987) 212
Generation of oxygen, carbon and metallic ion beams by a compact microwave source, Walther, S.R., K.N. Leung, K.W. Ehlers and W.B. Kunkel B21 (1987) 215

Section IV. New equipment and systems

Radio-frequency linear accelerators for ion implanters, Glavish, H.F. B21 (1987) 218
200 mm end station for ion beam implanters, Taylor, C., P. Splinter, A. Weed, J. Grant and S. Holden B21 (1987) 224
A high current, high voltage oxygen ion implanter, Ruffell, J.P., D.H. Douglas-Hamilton, R.E. Kaim and K. Izumi B21 (1987) 229
High current ion implanter aimed at clean and dust-free production, Komatsu, K., K. Takagi, O. Tsukakoshi, T. Katagawa, E. Kouno and S. Komiya B21 (1987) 235
PR-80 high current ion implantation machine, Kawai, T., M. Naitoh, M. Nogami, T. Kinoyama, N. Nagai and H. Fujisawa B21 (1987) 239
XP series high current ion implantation systems for up to 200 mm wafer processing, Thayer III, R.B. B21 (1987) 245
A 100 mA class ion implanter for large scale production of buried oxide SOI wafers, Moffatt, S. B21 (1987) 251
The Veeco 4840 automated implant system, Scaife, W. B21 (1987) 258
Production high energy ion implanters using radio frequency acceleration, Glavish, H.F., D. Bernhardt, P. Biosseau, B. Libby, G. Simcox and A.S. Denholm B21 (1987) 264
Production MeV ion implanters for energies from 200 keV to 4 MeV, Rathmell, R.D. and G.A. Norton B21 (1987) 270
The precision implant 9000 beam line, Aitken, D. B21 (1987) 274

New ion implantation system with advanced process capabilities, Wauk, M.T. B21 (1987) 280
Design considerations of a VLSI compatible production MeV ion implantation system, Turner, N., K.H. Purser and M. Sieradzki B21 (1987) 285
A 1 and 2 MV ion implantation facility, Koudijs, R., P. Dubbelman, W.H. Urbanus and J.G. Bannenberg B21 (1987) 296
Development of a 200 kV high current accelerator with post acceleration mass analysis for O^+ implantation into silicon, Proudfoot, G., T.S. Green, M. Inman and C.M.O. Mahony B21 (1987) 300
A 400 keV ion accelerator for surface study, Uchiyama, T., K. Takagi, T. Katagawa, Y. Mihara, R. Fukui, O. Tsukakoshi, R. Kikuchi, A. Isoya, S. Komiya, T. Koshikawa and T. Suzuki B21 (1987) 306
A 600 keV research heavy ion implanter, Yuan, Jiang Xin, Lu Shi Wan and Shi Zhi Zu B21 (1987) 310
Large diameter ion beam implantation system, Matsuda, K., F. Fukumaru, Y. Mizutani, M. Konishi and K. Matsunaga B21 (1987) 314
A high throughput end station of a high current ion implanter, Komatsu, K., K. Yui, T. Terasawa, K. Niikura, E. Kouno and S. Komiya B21 (1987) 317
Accelaration column for a high current oxygen implanter, Kaim, R.E., D.H. Douglas-Hamilton and J.P. Ruffell B21 (1987) 321
End station design and wafer quality control for a high current oxygen implanter, Douglas-Hamilton, D.H., J.P. Ruffell, R.E. Kaim and K. Izumi B21 (1987) 324
The precision implant 9000, a new concept in ion implantation systems, Steen, L.S., J.M. Hall, D. Aitken, F.G. Plumb, M.T. Wauk, N. Bright, C. Pruitt and L. Robinson B21 (1987) 328
A high current injector for tandem accelarators, O'Connor, J.P. and L.F. Joyce B21 (1987) 334
Computers and the design of ion beam optical systems, White, N.R. B21 (1987) 339

Section V. Process and yield effects

Charging studies in applied metarials precision implant 9000 system, Hall, J.M., H. Glawischnig and W. Holtschmidt B21 (1987) 350
A new computer designed Faraday system for high current ion implantation systems, Outcault, R., C. McKenna, T. Robertson and L. Biondo B21 (1987) 354
A study of wafer and device charging during high current ion implantation, Basra, V.K., C.M. McKenna and S.B. Felch B21 (1987) 360
Wafer cooling in a high current ion implanter, Benveniste, V. B21 (1987) 366
0.5 μm particulate performance of a batch process implanter, Jost, J., G. Angelo and J. Turner B21 (1987) 372
Some problems in particulate acceleration, Setvak, M. B21 (1987) 378
Recent improvements in the particle performance of a Varian 350D ion implanter, Milgate, R. and R. Simonton B21 (1987) 381
A generalized mathematical model for wafer cooling with gas, Evans, D.C. B21 (1987) 385
Planar channeling effects in a batch process ion implanter, Liebert, R.B., D.F. Downey and V.K. Basra B21 (1987) 391
A method of surface charge neutralization during ion implantation, King, M.L., S.E. Sampayan and B.H. Hight B21 (1987) 396

Section VI. Dosimetry

Recent improvements in double charged ion beam energy purity for serial process ion implanters, Kalbfus, C.R. and R. Milgate B21 (1987) 400
Discharge of P^{2+} ions in the beamline of medium current implanters, Brack, K., W. Euen and D. Hagmann . . . B21 (1987) 405
Implant uniformity improvement using advanced scanning techniques, Myron, D.D. and D.R. Zrudsky B21 (1987) 410
New dosimetry system for a serial process ion implanter, Lundquist, P., C. McKenna, R. Brick and P. Corey . . . B21 (1987) 414
Dosing accuracy: a comparison of several experiments, Larson, L.A. and G.L. Kennedy B21 (1987) 421
Improvements in dose uniformity on high current ion implantation systems, Eddy, R., A. Long, S. Smith and J. Tkach B21 (1987) 424
An etch-study of ion implanted SiO_2 films, Marinescu, R. B21 (1987) 428
0.1% ultra-uniformity in electrostatically scanned ion implantation systems, McGuire, E. B21 (1987) 431

Section VII. Range, damage and shallow junctions

Amorphization implants and low temperature rapid thermal processing to form low sheet resistance, shallow junction, boron implanted layers, Wilson, S.R., W.M. Paulson, R.B. Gregory, B.C. Lamartine, J.A. Leavitt, L.C. McIntyre Jr and J.L. Seerveld B21 (1987) 433
MeV-energy B^+, P^+ and As^+ ion implantation into Si, Tamura, M., N. Natsukai, Y. Wada and E. Mitani B21 (1987) 438
Profile studies of MeV ions implanted into Si, Wong, H., E. Deng, N.W. Cheung, P.K. Chu, E.M. Strathman and M.D. Strathman B21 (1987) 447
Critical aspects of high energy implants for CMOS technology: channeling effects and masking problems, Spinelli, P., A.M. Cartier and M. Bruel B21 (1987) 452

Dynamic simulation of ion implantation with damaging processes included, Saito, T., H. Yamakawa, S. Komiya, H.J. Kang and R. Shimizu B21 (1987) 456
Range distributions of MeV implants in silicon II. A comparison of SIMS and spreading resistance profiles of B, P and Ga, Ingram, D.C., J.A. Baker, D.A. Walsh and E. Strathman B21 (1987) 460
Damage profiles of MeV implants of Ga and Si in silicon, Rai, A.K., J.A. Baker, D.C. Ingram, A.W. McCormick and D.A. Wâlsh B21 (1987) 466
Monte Carlo simulation of recoil range distributions in multilayer GaAs targets, Tejwani, M.J. and P. Riemenschneider B21 (1987) 471
Determination of the implanted dopants distribution by Pearson's function, Martan, J. B21 (1987) 476
Computer simulations of the ion implantation process in layered materials, Cui, F.-Z., H.-D. Li and J.-P. Zhang B21 (1987) 478
Study of mechanical strains in implanted silicon slices, Domkus, M., L. Augulis, L. Pranevičius, L. Puodžiukynas and G. Zubauskas B21 (1987) 480
Deep p-type layer formation using Al^+ implantation and diffusion into Si, Yoshida, M., A. Tohi and M. Inoue . B21 (1987) 483
Use of ultra-low-energy BF_2^+ implantation and rapid annealing to avoid channeling effects in shallow junction formation, Felch, S.B. and R.A. Powell B21 (1987) 486
The use of self-implanted amorphized silicon substrates to eliminate channeling effects in low energy boron implants, Simonton, R.B. B21 (1987) 490
Formation of shallow P^+N junctions by dual F^+/B^+ implantation, Biasse, B., A.M. Cartier, P. Spinelli and M. Bruel B21 (1987) 493
The effect of implant species on defect anneal kinetics part I: silicon and phosphorus implantation, Prussin, S. and K.S. Jones B21 (1987) 496
The effect of implant species on defect anneal kinetics part II: arsenic and germanium implantation, Jones, K.S., S. Prussin and E.R. Weber B21 (1987) 499
Crystalline state information from secondary ion mass spectrometry, Smith, H.E., G.H. Morrison and D.T. Hodul B21 (1987) 503
RTP shallow junction formation of low energy boron implants into preamorphized silicon, Basra, V.K. and D.F. Downey B21 (1987) 505

Section VIII. Automation

Robotics and host computer interface for NV-10 high current implanters, Garvey, E. and L. Zimmermann B21 (1987) 509
Integrated factory interface for the precision implant 9000 ion implanter operator. Operator, service personnel, factory management host, and remote diagnostics, Southwood, P.D. and N.J. Bright B21 (1987) 514
Process yield improvements with process control terminal for Varian serial ion implanters, Higashi, H., A. Soni, L. Martinez and K. Week B21 (1987) 518
Optimization of the ion implantation process, Mączka, D., A. Latuszyński, R. Kuduk and J. Partyka B21 (1987) 521
Intelligent performance optimization for a fully automatic high current ion implantation system, Wonson, C. and T. Thompson B21 (1987) 523

Section IX. Measurement tools

Monitoring low dose single implanted layers with four-point probe technology, Chen, J.T.C. B21 (1987) 526
Sheet resistance monitoring of low dose implants using the double implant technique, Smith, A.K., W.H. Johnson, W.A. Keenan, M. Rigik and R. Kleppinger B21 (1987) 529
Ion implant monitoring with thermal wave technology, Smith, W.L., A. Rosencwaig, D.L. Willenborg, J. Opsal and M.W. Taylor B21 (1987) 537
Latest advances in ion implant optical dosimetry, Golin, J.R., N.W. Schell, J.A. Glaze and R.G. Ozarski B21 (1987) 542
Thermal-wave measurements of ion implanted silicon, Kirby, B.J., L.A. Larson and R.-Y. Liang B21 (1987) 550
Relaxation of ion implant damage in silicon wafers at room temperature measured by thermal waves and double implant sheet resistance, Schuur, J., C. Waters, J. Maneval, N. Tripsis, A. Rosencwaig, M. Taylor, W.L. Smith, L. Golding and J. Opsal B21 (1987) 554
Thermal wave implant dosimetry for process control on product wafers, Wendman, M.A. and W.L. Smith B21 (1987) 559
Bridging implant technique to characterize MeV implants, Keenan, W.A. B21 (1987) 563

Section X. Metals, ceramics, compound semiconductors

An apparatus for combined vapor deposition and ion implantation to modify the surface properties of metals, Margesin, B., F. Giacomozzi, L. Guzman, G. Lazzari and V. Zanini B21 (1987) 566
Equipment for ion beam assisted deposition, Wolf, G.K., K. Zucholl, M. Barth and W. Ensinger B21 (1987) 570
Electron beam doping in substrates of overlayer Si/substrate GaAs, Si/GaAsP and evaporated Ge/Si, Wada, T. and M. Takeda B21 (1987) 574

Ion-beam-induced decomposition of bismuth germanium oxide crystal surfaces, Feng Xiqi, Wei Zongying and Zou Weiyuan B21 (1987) 576
$^{11}B^+$ implantation and postimplant anneal studies in $Hg_{1-x}Cd_xTe$, Kao, T.-M. and T.W. Sigmon B21 (1987) 578
Rapid thermal annealing of arsenic, beryllium and zinc dual implanted AlGaAs, Ho, P., Y. Chung and V.W. Aebi B21 (1987) 581
The effect of sample temperature on the structure of He^+ implanted optical waveguides in $LiNbO_3$, Weiss, B.L. and J.M. Naden B21 (1987) 584
Deposition of boron nitride thin films by ion beam assisted deposition, Bricault, R.J., P. Sioshansi and S.N. Bunker B21 (1987) 586
Aluminum surface modification by a non-mass-analyzed nitrogen ion beam, Ohira, S. and M. Iwaki B21 (1987) 588
Wear behaviour of nitrogen implanted stainless steel, Shrivastava, S., A. Jain, A. Sethuramiah, V.D. Vankar and K.L. Chopra B21 (1987) 591
Improvement of secondary electron emission characteristics by ion implantation, Liu Xiang-huai, Tsou Shih-chang and Tu Yu-shen B21 (1987) 595
Effect of the target temperature on the surface modification of Cr-deposited Fe by ion beam mixing, Tian Wei, Li Jiun, Cao Niansen and Cai Weiping B21 (1987) 597
The preparation of i-c films with low ion beams, Zheng Lirong and Wang Xiuqing B21 (1987) 601
Repetitive mode pulsed ion implanter with magnetically insulated diode, Krafcsik, I., L. Kiralyhidi, P. Riedl, M. Fried, J. Gyulai and F. Pavlyak B21 (1987) 604
Development of surface topology during ion sputtering of silicon, Augulis, L., B. Jasiulionis and L. Pranevičius . B21 (1987) 608
Some experimental studies on GCr15 steel by nitrogen ion overlap-implantation, Jin Jiucheng, Luo Yingming, Zhao Chuanguo and Chen Huanzheng B21 (1987) 610

Section XI. Rapid thermal processing

Uniformity characterization of an RTP system, Gelpey, J.C., P.O. Stump, J. Blake, A. Michel and W. Rausch . . B21 (1987) 612
Measurement of temperature profiles across single wafers in rapid thermal annealers, Pramanik, D. and A.N. Saxena B21 (1987) 618
A new VLSI compatible rapid thermal processing system, Aitken, D., S. Mehta, N. Parisi, C.J. Russo and V. Schwartz B21 (1987) 622
Dopant redistribution of As-implanted SOI films during rapid thermal annealing, Lin Cheng-lu and Tsou Shih-chang B21 (1987) 627
Studies of thin oxides grown by rapid thermal processing, Mehta, S., D.T. Hodul and C.J. Russo B21 (1987) 629
Process control of titanium silicide formation using rapid thermal processing, Kermani, A., T. Debolske, J. Crowley and T. Stultz B21 (1987) 633
